

Post-doc Offer in the CIRB

As of April 2023: 3 years founded post-doctoral position in the Terret/Verlhac Lab at the CIRB, Collège de France in Paris ([Oocyte Mechanics and Morphogenesis](#)).

Project: to study the impact of cytoskeletal elements on gene expression in mouse oocytes. Interested in science at the interface between cell biology, computational biology and bio-physics? Do not hesitate to contact me : marie-helene.verlhac@college-de-france.fr

The project will be a new avenue taken from these works (Almonacid Nat Cell Biol 2015; Almonacid Dev Cell 2019; Al Jord, Nat Commun 2022).
